6 x 3" Photographs:

Approved For Release 1999/09/24 : CIA-RDP83-00423R001900810001-1

India 12 May 1975

1. Looking upstream (north) at left powerhouse location. The downstream coffer dam and outlet of the left diversion tunnel are seen in this photograph. *CIA-168204*
2. Looking approximately east at left powerhouse and 4 of the penstock tunnels. The downstream edge of the tow of Bhakra Dam is about where the shovel stands in the foreground of the photo. *CIA-168205*
3. Looking upstream (north) showing upstream coffer dam and where the actual dam will be. The shovel seen in previous photo (No. 2) is seen in right portion of photo. *CIA-168206*
4. Shows the upstream coffer dam, and on the right side, the left diversion tunnel. *CIA-168207*
5. The aggregate classification plant, located downstream from the dam site at the so-called 1,400 foot elevation. *CIA-168208*
6. The concrete batching and mixing plant. The derrick boom seen next to the plant is 192 feet long. It is located in back of the derrick boom seen in foreground of photo No. 2. *CIA-168209*
7. Six cement silos of 5,000 barrels each. They are located downstream from the dam site, towards the Sutlej River from the classification plant. *CIA-168210*
